DESCRIPTION

Peptilux anti-wrinkle 'time freeze effect' day face cream has a fluid and light texture. It is suitable for all skin types and is rich in functional active ingredients that give it a botox-like, anti-wrinkle, brightening, revitalizing, antioxidant and protective effect. Its special formula contains "ALPHADERM™", an innovative complex of peptides designed to reduce the signs of ageing: its dipeptide is able to rapidly reduce the appearance of wrinkles and expression lines, thanks to its botox-like effect that allows to reduce wrinkles and does not alter facial expressiveness; it is fast-acting, long-lasting and reversible. If used early, on young skin, it helps delay the appearance of wrinkles, with an age-freezing effect; it also rejuvenates and smooths the skin. The smoothing effect the cream offers on deep wrinkles is visible after just 4 weeks of application. Grapeseed Oil contained in the formula stands out for its antioxidant properties and protects the skin against premature ageing, weathering and free radicals; it also has a moisturizing, smoothing and sebum-regulating effect. Jojoba Oil revitalizes, regenerates and prevents wrinkles, leaving the skin smooth, silky and moisturized. Plant-derived Squalene is known for its emollient properties as it allows to restore the superficial lipid film. It stands out for its soothing properties for sensitive and irritated skin, as well as for its anti-ageing and antioxidant affect. You will treat yourself with a real beauty ritual making the skin firmer, smoother and more radiant from the very first application. DERMATOLOGICALLY TESTED

HOW TO USE

Apply in the morning to a perfectly clean and dry face, neck and décolleté.

WARNING

If in eyes, wash immediately with water and get medical attention, if necessary. Avoid release to the environment. Avoid any accidental damage or incorrect handling that might cause product leakage. Store in a cool, dry place away from heat.
