DESCRIPTION

Peptilux anti-wrinkle "lifting effect" day face serum is enriched with peptides with an anti-ageing effect. It provides deep moisture and is effectively absorbed by the skin. Its special formula contains "PEPFIL™", an innovative complex of peptides designed to achieve an effective anti-ageing action. It is enriched by the presence of a DNA double helix with an immediate and long-lasting 'lifting effect', which visibly reduces the appearance of wrinkles in the areas most prone to signs of ageing. It repairs from UV damage by significantly reversing the visible signs of photoaging. It protects the skin from pollution particles in the air and improves skin firmness and elasticity with an immediate lifting and tensor effect. Finally, it exerts a plumping action, increases the thickness of the skin and promotes collagen production. Its effectiveness is guaranteed by the extraordinary balanced blend of hyaluronic acids, which combines the strong moisturizing, film forming and soothing effect of the high pm fractions with the anti-ageing effect of the low pm ones, significantly reducing skin roughness and stimulating the expression of genes involved in maintaining skin integrity. DERMATOLOGICALLY TESTED

HOW TO USE

Apply in the morning to your thoroughly cleansed face.

WARNING

If in eyes, rinse immediately with water and get medical attention, if necessary. Avoid release to the environment. Avoid falls, shocks and inappropriate handling that might cause spillage of the product. Store in a cool, dry place away from heat sources.

INGREDIENTS (INCI)

PEPFIL™: Aqua, sodium hyaluronate, 1,2-hexanediol, sodium DNA, citric acid.

PAO DEADLINE

6 Months
