DESCRIPTION

PROPERTIES AND BENEFITS

A blend of essential oils with an expectorant action that helps to clear the upper airways of phlegm, aiding coughing.

This synergy of essential oils, formulated in our laboratories, enhances their respective beneficial effects by blending them in precise concentrations, which contributes to respiratory wellbeing in case of symptoms related to stuffy nose.

Red Thyme Essential Oil stands out for its well-known antiseptic, antibacterial and expectorant properties; Tea Tree Essential Oil is an excellent mucolytic, useful to fight flu syndromes; lastly, Silver Fir contributes to improve breathing.

DERMATOLOGICALLY TESTED

CPNP REFERENCE: 4828388

HOW TO USE

USE AND PRACTICAL ADVICE

Balsamic ointment: pour 5-10 drops into a neutral cream, mix and massage onto the chest up to three times a day, covering it with a warm woollen cloth, in case of bronchitis and nasal congestion. For a more intense effect, pour a few drops directly onto the chest and massage until fully absorbed.

Balsamic solution: in case of sinusitis and headaches, apply a few drops onto the forehead or mix a few drops with cold/warm water to create a cooling/warming compress and apply to forehead, temples or chest. Wet it again and reapply as the cloth warms up or dries out.

Steam inhalation: pour 10-20 drops, depending on the desired intensity, into a small pot of water previously brought to the boil, cover the head with a towel and inhale the vapours.

Environmental diffusion: add 6-7 drops per 300 ml of water in the tray of the radiator. Alternatively, for more instantaneous benefits, pour 2-3 drops onto a handkerchief to inhale its balsamic vapours.

WARNING

Contraindicated during pregnancy, breastfeeding and in children under 3 years of age. Not recommended in cases of convulsive disorders, epilepsy, hyperthyroidism or allergies to essential oils. For external use only. Do not ingest. Avoid contact with eyes and mucous membranes. If in eyes, immediately rinse with water and get medical attention, if necessary. Before use, perform a test on the crook of the elbow to check the tolerability of the oil. Do not spray inside steam inhalers or nebulisers, to avoid clogging the machinery. Store in a cool, dry place away from heat sources. Any slight colour variation is an indication of the naturalness of the components and does not affect the quality of the product. Do not release into the environment.
