DESCRIPTION

PROPERTIES AND BENEFITS

A blend of essential oils with a draining action that, by acting on the lymphatic system, promotes diuresis and the elimination of excess fluids that cause water retention, swelling and cellulite.

This synergy of essential oils, formulated in our laboratories, enhances their respective beneficial effects by blending them in precise concentrations, which helps improve circulation and reduce the imperfections of cellulite. Cypress essential oil combats fluid retention and cellulite; Rosemary essential oil stimulates peripheral circulation and acts on the lymphatic system, stimulating drainage; lastly, Mandarin essential oil stimulates the lymphatic circulation and promotes the reabsorption of liquids.

DERMATOLOGICALLY TESTED

CPNP REFERENCE: 4828641

HOW TO USE

USE AND PRACTICAL ADVICE

Massage lotion: pour 5-10 drops into a neutral cream, mix and massage with circular motions until fully absorbed; alternatively, mix a few drops with a massage oil. For a more intense effect, pour and massage a few drops directly onto the treatment area.

Wraps: pour 2-3 drops into mud or clay wraps.

Anti-fatigue bath solution: pour 10 drops into the bathtub water, emulsify and soak in for 10 minutes.

Footbath solution: pour a few drops into the water to reduce swelling and to refresh feet, as well as to reactivate circulation. For a more intense effect, pour a few drops of essential oil on a handful of coarse salt, then pour it into the water.

WARNING

Contraindicated during pregnancy, breastfeeding and in children under 3 years of age. Not recommended in cases of convulsive disorders, epilepsy, hyperthyroidism or allergies to essential oils. Avoid prolonged use; do not use within 24 hours before sun exposure as it is photosensitising. For external use only. Do not ingest. Avoid contact with eyes and mucous membranes. If in eyes, immediately rinse with water and get medical attention, if necessary. Before use, perform a test on the crook of the elbow to check the tolerability of the oil. Do not spray inside steam inhalers or nebulisers, to avoid clogging the machinery. Store in a cool, dry place away from heat sources. Any slight colour variation is an indication of the naturalness of the components and does not affect the quality of the product. Do not release into the environment.
