DESCRIPTION

Chopet Tick Repellent Spray is a natural product suitable for use on small, medium and large-sized dogs. This product has a natural antibacterial and soothing function, making your outdoor walks around parks and gardens, by the sea and lakeshore finally safe. Its effectiveness against insect and tick bites makes this product also suitable for the treatment of puppies and pregnant dogs. The spray is enriched with Neem Oil, which has anti-fungal, antibacterial, anti-parasitic and antiseptic properties. Aloe Vera, present in the formula, has a soothing effect on the skin and protects against inflammation. Our tick repellent spray contains Red Thyme Essential Oil, which stands out for its antiseptic, anti-fungal and antibacterial properties. Not for dogs with white coat.

HOW TO USE

Shake the bottle and apply to the animal's entire coat. Spray at a minimum distance of 20 cm and rub carefully. Avoid contact with your dog's eyes and mucous membranes. The product is resistant to water and bathing. First 7-day boost treatment: treat dogs under 10 kg with 3 sprays a day; use 5 sprays daily for dogs of 11-20 kg; use 9 sprays daily for dogs of 21-40 kg; use 11 sprays daily for dogs over 40 kg. Follow-up care (from the eighth day onwards): by taking into account your dog's body weight, double the number of sprays used for the boost treatment at 3-day intervals.

WARNING

Not for dogs with white coat. Avoid release to the environment. Avoid any accidental damage or incorrect handling that might cause product leakage. Store in a cool, dry place away from heat.
